FRESHWARE
NEXT GENERATION HARDWARE

INTERCHANGEABLE BARREL SYSTEM FROM CYBER-LOCK

NEW

INTRODUCING CL4 PLUS EXTERNAL WAVE KEY DESIGN

CL43P-MWA2-KD barrel	K191-93-MWA-MK master key	K191-92-RWA removal key

Freshware are proud to introduce a new key series to its range. The CL4 PLUS offers added security via a specially carved wave design on a 2.5mm thick key. The wave pattern is on the two opposite sides which enables the profile to have up to 3000 different key changes.

As with the preceding series of CL range of keys, the CL4 PLUS are master keyed and operate with the convenient removable barrel system. The barrel face has a small convex head shape like their counterparts and are silver in finish.
Details of the CL4 PLUS components are as follows:

Product code	Keying options	Pack	Outer
CL43P-MWA2-KD	Keyed differ	10	100
CL43P-MWA2-KA001	Keyed alike 001	10	100
CL43P-MWA2-KA002	Keyed alike 002	10	100
CL43P-MWA2-KA003	Keyed alike 003	10	100
K191-93-MWA1-MK	Master key	10	100
K191-92-RWA	Removal key	10	100
K191-91-WA-CL	Uncut key blank	10	100

control + convenience

KL1050
electronic

The KL1050 is a simple to use smart card lock providing access to lockers, cabinets, cupboards etc. The lock is based on the popular KL1000 series. The KL1050 can be used by single or multiple users. It can fit in the place of an existing cam lock or be installed onto any new item that offers that cam lock template. It is battery operated (2 x AAA batteries) that perform up to 15,000 openings.

Features of the KL1050 lock are:
- Private function – suitable for repeated use by the same user(s). Supports up to 50 MIFARE cards.
- Public function – suitable for short term usage by multiple users.
- MIFARE, Ultralite, MIFARE desfire card compatible
- Master user card to enroll and delete users
- Technician card feature available
- Public pairing feature
- Up to 15,000 operations via 2 x AAA batteries
- Battery override feature
- Easy to fit and program
- Can be fitted vertically or horizontally
- All parts, fixings and templates included
- Silver finish only

The Carbine CMVL window stop has been designed to meet with the new BCA Building Codes of Australia in relation to comply with the "Falling from Windows" regulations. These new regulations require window safety devices to be installed on all above ground floor windows to prevent children from windows or balconies. The use of these devices and or locks becomes law by March 2018.

The Carbine CMVL window stop is an alternative version to the Carbine G70 window stop. The CMVL is for use on sliding windows. It has a push operation which positively engages a locating pin into the sliding window track, thus preventing it from being opened. A standard C4 type key is used just as you would in any lock to then disengage the pin. Available in one finish only of black.

The CMVL Window Stop complies due to its sole function being as a window opening limiting product only.

Other features are:

-- Modern design

-- Easy installation, fits in seconds with no screw fixing required

-- The patented C4 wafer barrel allows rekeying options if needed

-- Supplied with drilling template and packer

Important Notes:

To comply with regulations & provide adequate security, all locks must:

-- Be installed per the instructions included with the product

-- Be locked & have all keys removed

Suits BCA codes
